CENSUS OF IOWA

FOR THE

YEAR 1895.

COMPILED IN COMPLIANCE WITH CHAPTER 8, TITLE 2,
OF THE CODE OF IOWA.

BY

W. M. McFARLAND, SECRETARY OF STATE,

UNDER THE DIRECTION OF THE EXECUTIVE
COUNCIL.

DES MOINES:
F. R. CONAWAY, STATE PRINTER.
1896.

TABLE OF CONTENTS.

STATISTICS OF POPULATION.

TABLE No. 1.

Population of Iowa, 1895, according to age and sex, with comparisons with total population of 1890 and 1885, by townships, towns, cities and city wards. The first column gives the population of the township, including cities and towns; all others the population of the townships exclusive of cities and towns 1–81

TABLE No. 2.

Population according to color and sex, marriage relation and parentage 82–162

TABLE No. 3.

Showing the number of dwellings and families, persons subject to military duty, persons entitled to vote at general elections, persons who cannot read and write, children over six and under seventeen years not attending school, foreigners not naturalized, number of births and deaths, and the number of deaf and dumb, blind and insane not in state institutions 163–240

TABLE No. 4.

Population according to age and sex, with comparisons with population of 1890 and 1885, by counties 241–243

TABLE No. 5.

Population according to color and sex, marriage relation, and parentage, by counties 244–246

TABLE No. 6.

Showing by counties the number of dwellings and families; persons subject to military duty, entitled to vote at general elections, and who cannot read and write; children over six and under seventeen years not attending school; foreigners not naturalized; number of births and deaths, and the number of deaf and dumb, blind and insane not in state institutions 247–249

TABLE No. 7.

Population of cities according to age and sex, with comparisons with population of 1890 and 1885 250–251

TABLE No. 8.

Population of cities according to color and sex, marriage relation and parentage 252–253

TABLE No. 9.

Showing the number of dwellings and families; persons subject to military duty, entitled to vote at general elections, and who cannot read and write; children over six and under seventeen years not attending school; foreigners not naturalized; number of births and deaths, and the number of deaf and dumb, blind and insane not in state institutions, in cities of 2,000 inhabitants or over 254–256

TABLE No. 10.

Showing the population of the several counties of the territory and state of Iowa at each enumeration since the organization of the territory of Wisconsin 258–261

TABLE No. 11.

Showing the per cent of increase of population of the several counties at each enumeration as compared with the last previous enumeration, and for the last three decades. Where the numerals are preceded by (–) it shows a decrease of population 262–264

TABLE No. 12.

Showing the population of cities and towns having a population of 1,000 inhabitants and over, January 1, 1895, at each enumeration since 1850 265–268

TABLE No. 13.

Showing the population of cities and towns of 1,000 inhabitants and upward at each enumeration from 1875 to 1895, and the per cent of increase or decrease of population at each enumeration as compared with the last previous enumeration, and by decades. Where numerals are preceded by (–) it shows a decrease of population 269–271

TABLE No. 14.

Showing by counties the total number of dwellings and families and the number of persons to a dwelling and family, the percentage of males and females, and the native and foreign born persons to the total population 272–274

TABLE No. 15

Showing in cities of 2,000 inhabitants and upward the total number of dwellings and families and the number of persons to a family; the percentage of males and females, and of native and foreign born persons to the total population 275–277

TABLE No. 16.

Showing the total population, urban population, and per cent of urban to total population of the several counties of the state .. 278

TABLE No. 17.

Showing the population at various enumerations, by counties by sexes 279–283

TABLE No. 18.

Showing the population at various enumerations, by counties, by races 284–288

TABLE No. 19.

Showing the number at various enumerations, by counties, of families and dwellings 289–293

TABLE No. 20.

Showing the statistics at various enumerations, by counties, the number of voters, aliens and militia 294–300

TABLE No. 21.

Showing by counties the population of the congressional districts according to the enumerations of 1885 and 1895 301–302

TABLE No. 22.

Nativity—County of birth 304–307

TABLE No. 23.

Nativity—State of birth 308–313

TABLE No. 24.

Nativity—County of birth 314–329

TABLE No. 25.

Nativity—Showing the county of birth of the population of cities and towns having 1,000 inhabitants and over 330–333

TABLE No. 26.

Nativity—Showing the state of birth of the population of cities and towns having 1,000 inhabitants and over 334–339

TABLE No. 27.

Nativity—Showing the county of birth of the population of cities and towns having 1,000 inhabitants and over 340–359

TABLE No. 28.

Nativity—Showing the number in the population of natives of the several countries, with the percentage of each to the total population 360

TABLE No. 29.

Nativity—Showing the number in the population of natives of the several states and territories, with the percentage of each to the native and to the total population of the state 361

TABLE No. 30.

Nativity—Showing the number of the population born in the state, with county of birth 362

TABLE No. 31.

Occupations by counties 364–379

TABLE No. 32.

Showing the occupations of the inhabitants of cities having a population of 2,000 and over 380–395

TABLE No. 33.

Occupations—Showing the total number of persons employed in each of the leading occupations 396–397

TABLE No. 34.

Churches—Showing the number of church organizations of the several denominations in each county, with value of church property; members of church and Sabbath school, and the amount expended for support of church and Sabbath school--- 398–422

TABLE No. 35.

Churches—Summary of Table 34, for the state by counties------- 423–425

TABLE No. 36.

Churches—Summary of Table 34, for the state by denominations-- 426–427

TABLE No. 37.

Religious belief—Showing the religious belief of the inhabitants of the state over ten years of age, irrespective of church affiliation; also the number under ten years of age who were returned as entertaining a religious belief, and the number for whom no returns were given ---------- 428–434

TABLE No. 38.

Religious statistics—Showing the number of members of the churches of the several religious organizations as returned in the statistics of churches, and also the religious belief of the inhabitants over ten years of age irrespective of church affiliation, as reported by the enumerators in the population schedule ---------- 435–436

TABLE No. 39.

Population of cities and towns having 500 inhabitants and over, according to rank---------- 437–441

TABLE No. 40.

Population of cities and towns having 2,000 inhabitants and over, according to rank, with gain or loss as compared with the United States census of 1890, and per cent of gain or loss------ 442–443

TABLE No. 41.

Showing by counties the total and urban population, and the per cent of urban to total population -- ---------- 444–445

TABLE No. 42.

Roll of honor—Giving the name, age, place of residence and nativity of persons ninety years of age and upwards---------- 446–453

STATISTICS OF AGRICULTURE.

TABLE No. 43.

Grain—Giving by counties and townships the acreage, yield and value of product of winter and spring wheat, corn, oats, barley and rye ---------- 454–507

TABLE No. 44.

Potatoes, hay and grass—Giving by counties and townships the acreage, yield and value of product of Irish potatoes, timothy, clover, prairie grass, corn stalks and pastures---------- 508–560

TABLE No. 45.

Vegetables and fruits—Giving by counties and townships the yield and value of product of onions, beets, turnips and fruits..... 561–614

TABLE No. 46.

Acreage of farms—Giving by counties and the total for the state, the number and size of farms, the number of acres of improved and unimproved land, the number of acres cultivated, and the total value of farms..... 615–617

TABLE No. 47.

Management of farms and wheat—Giving by counties and the total for the state, the management of farms, rods of fence and tiling, and the acreage, yield and value of product of winter and spring wheat..... 618–620

TABLE No. 48.

Grain—Giving by counties and the total for the state the acreage, yield and value of product of corn, oats, barley, rye and buckwheat..... 621–623

TABLE No. 49.

Beans, peas and grass seed—Giving by counties and the total for the state, the acreage, yield, and value of product of beans and peas, and of flax, timothy, clover, Hungarian and millet seed.. 624–626

TABLE No. 50.

Root crops, etc.—Giving by counties and the total for the state, the acreage, yield and value of products of potatoes, onions, beets, turnips and watermelons..... 627–629

TABLE No. 51.

Hay and grass—Giving by counties and the total for the state, the acreage, yield and value of product of timothy, clover, Hungarian, millet and prairie grass hay, corn stalks and pasture and the tons and value of fodder preserved in silos..... 630–632

TABLE No. 52.

Agricultural products—Giving by counties and the total for the state, the product and value of flax-straw, sorghum, maple sugar and syrup, broom corn, hops and tobacco, and the acres of planted and natural timber, and the number of cords and value of wood cut, consumed and sold..... 633–635

TABLE No. 53.

Fruit—Giving by counties and the total for the state, the number of acres in nurseries and value of trees sold, the number of acres in apples, the number of bearing trees, bushels harvested and value of product of apples, pears, peaches, plums, cherries and other fruits..... 636–638

TABLE No. 54.

Small fruit—Giving by counties and the total for the state, the acreage, yield and value of product of grapes, strawberries, raspberries, blackberries and other small fruit..... 639–641

TABLE No. 55.

Horses and mules—Showing by counties and the total for the state, the number of different breeds of horses, the number sold for export, number imported and the value; and the number and value of mules and asses 642–644

TABLE No. 56.

Cattle—Giving by counties and the total for the state, the number of the different breeds of cattle, the number sold for slaughter and for export, number imported and the value, and the number and value of work oxen and milch cows 646–649

TABLE No. 57.

Hogs—Giving by counties and the total for the state, the number of the different breeds of hogs, the number sold for slaughter and export, number imported and the value 650–652

TABLE No. 58.

Sheep—Giving by counties and the total for the state, the number of the different breeds of sheep, the number sold for slaughter and export, number imported, number killed by dogs, and the value; the number of fleeces of wool cut and the value, and the number and value of dogs 653–655

TABLE No. 59.

Poultry and bees—Giving by counties and the total for the state, the number and value of chickens, turkeys and other fowls, the number of dozen eggs produced and marketed, the number of stands of bees and the number of pounds of honey produced and marketed, and the value of poultry, eggs and honey marketed 656–658

TABLE No. 60.

Giving by counties and the total for the state, the value of market garden, farm and forest products and the products of home manufacture not included in other schedules, also the number of farm mortgages, net amount of mortgage indebtedness on farms and average size of mortgages 659–660

TABLE No. 61.

Dairy statistics—Giving by counties and the total for the state, the number and value of cows from which milk or cream was furnished to creameries or cheese factories, or to city patrons, or from which butter or cheese was made, the value of milk and cream furnished city patrons, and the number of pounds and value of butter and cheese made 661–663

TABLE No. 62.

Creamery and cheese factory statistics—Giving by counties and the total for the state, the number and value of creameries and cheese factories; the number of patrons; the number of persons employed, and the number of pounds and value of butter and cheese made 664–666

TABLE No. 63.

Dairy statistics—Giving by counties and the total for the state, the total number of pounds of butter and cheese produced, as own by the different enumerations 667–672

TABLE No. 64.

Land and farms—Giving by counties and the total for the state, the total number of acres of improved and unimproved land in farms, and the average size of farms as shown by the different enumerations 673–678

TABLE No. 65.

Wheat—Giving by counties and the total for the state, the total number of acres grown and product of wheat, as shown by the several enumerations 679–684

TABLE No. 66.

Corn—Giving by counties and the total for the state, the total number of acres grown and product of corn, as shown by the several enumerations 685–690

TABLE No. 67.

Oats—Giving by counties and the total for the state, the total number of acres grown and product of oats as shown by the different enumerations 691–696

TABLE No. 68.

Potatoes—Giving by counties and the total for the state, the total number of acres grown and product of potatoes as shown by the different enumerations 697–702

STATISTICS OF MANUFACTURES.

TABLE No. 69.

Giving by counties and the total for the state, the value of manufacturing establishments, amount expended for material, value of manufactured product, number of hands employed and amount paid in wages 703–704

TABLE No. 70.

Giving by classified industries the number of manufacturing establishments, amount expended for material, value of manufactured product, number of hands employed and amount paid in wages 705–707

STATISTICS OF MINING.

INTRODUCTION.

In presenting to the state the fifteenth census of the state of Iowa, the executive council recognizes the vast benefit that has been derived from the various improvements adopted and carried out by the census heretofore taken. Each census has been in many particulars an improvement over former ones, until finally it is believed that the fifteenth census is as near perfect as a compilation can be under our present law.

The fourteenth census was an experiment along the line of changing former methods, which before that time had consisted in taking an abstract of all parts of the census from the ninety-nine county auditors, instead of taking a certified copy of the sheets from each census taker. The executive council, however, in 1885 only applied this changed method to the enumeration, leaving the more important and more complicated matters of farm products, manufactures, mines and other important matters to be taken under the old method of an abstract from each county auditor.

For the purpose of accuracy, and simply as an experiment, the executive council in 1885 decided to require a certified copy from each assessor, so far as the enumeration was concerned, to be sent to the secretary of state, and there compiled. In their report in the introductory of said census, they speak of the new method as follows:

> The unsatisfactory results obtained by the council in 1875, under the plan which it reluctantly followed, of having the assessors' returns abstracted by the county auditors, impressed the council with the importance of very carefully considering the propriety of adopting a different method. It was finally decided to require assessors to make duplicate schedules of the returns as to population, one copy to be forwarded by the county auditors to the secretary of state, and the statistics to be compiled under his direction; the statistics as to the productions and resources of the state to be gathered as before, *i. e.*, by having the county auditors make abstracts from the assessors' returns, from which abstracts the compilation should be made under the direction of the secretary of state. This was only a half step, but being largely an experiment, was all the council felt justified in taking. The results are in the highest degree satisfactory, and afford the most ample proof of the wisdom of having the entire compilation made under the supervision of one person.

Profiting by the experiments of the executive council in 1885, the executive council by unanimous vote decided that the secretary of state should require assessors to make duplicate schedules of the returns, not only as to population, but as to the productions and resources of the state, which duplicate should be forwarded by the auditors to the secretary of state, thus placing under the charge of the secretary of state the entire compilation of all parts of the census. This experiment has been carefully made,

and is in the highest degree satisfactory, and the council feel justified in stating, without fear that the result will contradict the statement, that the present census is as perfect as can be made under our present law. A duplicate of the sheets, filled out by every census taker in the state, was transmitted to the secretary of state, where, under the personal supervision of experts, the compilations were made, and not only were the apparent mistakes and discrepancies corrected, but every figure and every item in every sheet was submitted to the closest scrutiny, so that it is believed the matter contained in the fifteenth census is entirely reliable

Of course this has necessitated a heavy outlay of money from the state, as a large clerical force was required at the capitol to compile the statistics from the assessors' returns, which under the old plan would have been simplified and greatly reduced by each auditor furnishing the secretary with an abstract compiled and prepared by a clerical force in his office; but in reviewing the work of the council in 1875, and discovering the inaccuracies and mistakes amounting sometimes to the ludicrous, it is believed that the people of the state will be more than willing to pay the extra amount for the assured reliability of the census. In fact, while as an immediate outlay it has cost the state more money than would the old method, it is confidently believed that under the old method it would have cost equally as much, the extra expense being transferred to the auditor's office and paid there out of the county funds, instead of having been made in the secretary's office and paid out of the state funds, so that to the whole people of the state the cost of the present work is perhaps less than it would have been had the council pursued the old method. To illustrate the work that has been corrected in the present census, we quote from the report of the executive council in 1885, when speaking of the difficulties under which they labored in getting an exact census of the products of the state as compared with the exactness of the work in the census proper, which was sent to them in duplicate. The council in discussing this quote us the following:

> It is a matter of regret that the figures relating to the resources and productions of the state do not justify a similar degree of credence. This is, without question, largely due to the fact that the compiling of these statistics was left to the ninety-nine county auditors of the state, instead of being done entirely under the supervision of one person, as in the case of the population statistics. To illustrate: The abstract from one county showed the number of domestic grape vines in a certain township to be 784, the product of which, for 1884, was put down at 90,550 pounds of fruit, or an average of over 115 pounds to the vine. The number of sheep in one township appears to be 31; the value of same, $20,106.50, or $648 59 per head. In many townships a large valuation was reported with no corresponding number of articles, head of stock, etc., to which the valuation refers. These discrepancies and absurdities are not confined to any class of items, but are so numerous as to seriously discredit the greater part of the agricultural statistics. Of course every possible effort was made to have all such errors corrected, but the difficulties encountered in attempting to get back of the ninety-nine county auditors' abstracts may be easily imagined. Had the secretary of state been in possession of the assessors' schedules, showing the figures as to each farm separately, it will be readily seen that the methods of verification, employed to such good purpose on the population tables, could have been applied with equal advantage in getting rid of the errors above instanced.

In the present instance we had this advantage, which is referred to in the above paragraph, and it would be possible to enumerate hundreds of instances of as glaring errors and mistakes which were corrected, as are

cited above. Having the sheet of the particular assessor in the possession of the supervisor of the census, where no correction could be made of the matter, it was returned with the inconsistencies and mistakes pointed out, and the assessor himself was enabled to make the corrections and get the matter as near correct as possible. This has been done in cases almost without number.

It was also possible to make corrections by footing various columns of figures, and proving the one by the other, so that one of the great items of work in preparing and compiling the present census was making each column of figures prove itself by every other column of figures on the same sheet to which it was related. Thus it has been possible to get an exact census. It is believed by the council that the present experiment has been so successful that no future council will think of going back to the old method of receiving abstracts from the county auditors. In fact, it is recommended that our census laws be so changed as to embody the substance of what the council has, in the present instance, carried out practically.

Another fact that the council feels called upon to present is an important one, relating to the former reputation of Iowa as a producing state. The year 1894, upon which the census of 1895 is based, was the first year in the history of Iowa when an almost total failure of crops occurred. This being the case, of course the yield of the various products given to Iowa as set out in the present census, is very misleading to those who are not familiar with the fact announced, and in order that this may as far as possible be corrected, it is thought best to append hereto a table, showing the yield of corn and oats in the years 1893 and 1895, the year before and the year after the year upon which the present census is based. Corn, oats and hay being three of the principal crop products of Iowa, it will be seen how great are the embarrassments of gaining from our present census an adequate idea of the average yield of the various crops in Iowa.

TABLE.

Year.	Corn.	Oats.
1893	214,804,758	100,742,852
1894	128,989,047	107,691,460
1895	285,000,000	201,600,000

It is hoped that the views of the council and systems herein contained will not be misunderstood. There is no disposition to either criticise or discredit the faithful work heretofore done by the township assessors of the state in obtaining the material for the various reports, or the auditors in the performance of their share of the work. The council simply desire to emphasize the fact that the whole scheme brought under the supervision of one efficient superintendent can be made more accurate than to be left to ninety-nine auditors, with assistants they might be able to pick up either in their own office or in their own counties, without any special skill for the work.

The council has been enabled to secure the services of skilled statisticians, many of whom had experience in former census work, and some in the census department of the United States, and it is probably due to the assessors of the state to say that they are fully as able, as a body, as the census takers appointed in 1890 by the United States government.

It would be unjust also for the council to neglect to mention the invaluable services of Capt. Frank E. Landers, the present clerk of the executive

council, who was appointed as supervisor of the census. To his careful, efficient work, his painstaking and untiring efforts, a great deal of the good features of the present census is due. He is a statistician by instinct and by experience, and has been enabled to give the state a great deal of valuable experience and ability that is rarely obtained in such positions.

TABLE No. 13.

Showing the population of cities and towns of 1,000 inhabitants and upward, at each enumeration from 1875 to 1895, and the per cent of increase or decrease of population at each enumeration as compared with the last previous enumeration, and by decades. Where numerals are preceded by (–), it shows a decrease of population.

CHRISTIAN CONRAD.

Died March 5, 1886, aged 116.

Mr. Conrad was born in Cumberland county, Pennsylvania, September 22, 1780. He was living on the old homestead, a man over 30, when the war of 1812 broke out. A cousin brought the news and Mr. Conrad abandoned the farm for the field of arms. His company was ordered to the Niagara frontier, and as a private in the ranks he took part in Colonel Miller's historic and successful charge on Queenstown Heights. He also participated in the battle of Fort Erie, and witnessed Commodore Perry's famous victory on Lake Erie.

Upon the close of the war Mr. Conrad returned to the farm, where he remained until the opening of the Erie canal, upon which he operated a line of boats for seven years. He also navigated the Susquehanna for some years, and in 1845 settled in McHenry county, Illinois. In 1860 he removed to the present farm in Delaware county. His habitation was a log house with two rooms, and his companion was his wife, who at the age of over 80, still performs the duties of housekeeper and is as cheerful as a matron of 40. They were married sixty-two years ago, and their eleven children, ranging in age from 30 to 58 years, are all living, besides forty-two grandchildren and thirty-four great-grandchildren.

THE VARIOUS JURISDICTIONS OVER IOWA.

FROM THE ANNALS OF IOWA, JULY, 1893.

The territory now known as the State of Iowa passed through a long succession of jurisdictions, or ownerships, prior to the 28th day of December, 1846, when it became one of the United States, the first to claim ownership being Pope Alexander VI.

GRANT TO THE KING AND QUEEN OF SPAIN.

1493. Pope Alexander VI granted to Ferdinand and Isabella, king and queen of Aragon and Castile, Spain, all the continents, inhabited by infidels, which they had discovered, extending the assignment to their heirs, and successors, the kings of Castile and Leon. The boundary between the grants to Spain and Portugal was fixed on a line drawn from pole to pole, 100 leagues west of the Azores. All countries east of that meridian not actually possessed by any Christian prince were to belong to Portugal; all to the west to Spain. Owing to the dissatisfaction of Portugal as to the boundary fixed in the grant to that country and Spain, a commission was appointed, which, on July 2, 1493, agreed on a line 270 leagues farther west. In the first assignment Portugal only secured the title to what was found to be a vast expanse of ocean, and the change of meridian was made in the belief that she would thereby acquire some portion of terra firma. But in this she was also doomed to disappointment.

THE CABOT PATENTS.

1496. Henry VII, king of England, granted to John Cabot and his sons, Lewis, Sebastian and Sancius, a patent of discovery, possession and trade. This was to include all the lands they might discover, of which they were to take possession in the name of the English crown. England laid claim in 1498 to all of North America, through the discoveries of John Cabot.

THE PLYMOUTH COMPANY'S CHARTER.

1620. James I, king of Great Britain, France and Ireland, granted to the council at Plymouth, England, all that part of America lying between the fortieth and forty-eighth degrees of north latitude, and extending from "sea to sea." This grant included within its limits the whole of Iowa, and challenged any rights Spain may have received from the pope.

THE MASSACHUSETTS COMPANY'S CHARTER.

1628. The "council established at Plymouth," England, granted to Sir Henry Roswell and others, all that part of New England in America

extending along the Atlantic coast from three miles north of the Merrimac to three miles south of the Charles river, and westward between the latitude of 42 degrees, 2 minutes and a point three miles north of the most southerly bend of the Merrimac, to the South sea. This grant gave to the Massachusetts company that part of Iowa lying between parallels passing through the north edge of Clinton county and the south part of Clayton county. Charles I, king of England, granted, March 4, 1629, to Sir Henry Roswell and twenty others, a charter similar to that of 1628, with the exception that no part of the lands therein granted were, on the 3d day of November, 1620, inhabited by any other Christian prince, or within the limits of the Southern Colony of Virginia. The associates were made "one body corporate and politic in fact and name, by the name of the Governor and Company of Massachusetts Bay in New England."

THE WARWICK GRANT.

1630. The council at Plymouth granted to the Earl of Warwick a tract of country south of Massachusetts The earl on the 19th day of March, 1631, transferred the grant to Lords Say and Sele, Brooke and others. The country was defined in the transfer as lying south of Massachusetts and west of Narragansett river, extending westward 120 miles along the coast, and thence west to the Pacific. The Warwick grant embraced that part of Iowa lying between latitude 41 degrees and 42 degrees, 2 minutes, parallels passing through near the center of Henry county and the north edge of Clinton county.

THE PLYMOUTH COMPANY'S CHARTER.

1635. The charter of the Plymouth company was surrendered to the crown of England to obtain a confirmation of the respective rights of the original members of the company. The grant was divided into twelve parts and distributed by lot. No territory was partitioned lying west of forty miles west of the Hudson. The province of Virginia, on the surrender of the charter of the Plymouth company, extended its jurisdiction to the forty-first parallel, the south line of the Warwick grant. The territory of Iowa was then claimed by Virginia, the assignees of the earl of Warwick, and Massachusetts, to the north line of Massachusetts, and from thence north by the crown of England.

THE MASSACHUSETTS BAY COMPANY.

1652. The general court of Massachusetts extended the northern boundary of the province to three miles north of the head of the Merrimac —latitude 43 degrees, 43 minutes, 12 seconds—and west to the Pacific. This extension of boundary placed all of northern Iowa under the claim of Massachusetts.

THE CONNECTICUT CHARTER.

1662. Charles II, king of England, Scotland and France, granted a charter to John Winthrop and other associates to the country included in the Warwick grant of 1630, the colonists having purchased the rights of the patentees in 1644.

THE MASSACHUSETTS BAY COMPANY.

1677. The crown of England ordered that the northern bounds of Massachusetts be restored to within three miles of the Merrimac, thereby leaving the jurisdiction of the north part of Iowa subject to the direct control of the king, as it was previous to 1652. The colony, however, still claimed to the northern limits.

LA SALLE'S PATENT.

1678. Louis XIV, king of France and Navarre, granted a patent to Robert de La Salle, permitting him to endeavor to discover the western part of New France. April 9, 1682, La Salle, having descended the Mississippi and explored the shores of the gulf of Mexico to the westward, took formal possession of the country in the name of the king of France, "from the mouth of the Ohio, also along the Mississippi and the rivers discharging themselves thereinto from its source beyond the country of the Nadonessioux as far as its mouth at the gulf of Mexico."

THE MASSACHUSETTS COMPANY'S CHARTER.

1684. The court of chancery at Westminster, England, decreed that the patent of Massachusetts should be brought into court and canceled.

THE MASSACHUSETTS BAY COMPANY'S CHARTER.

1691. William and Mary, king and queen of England, granted a charter uniting the colonies of Massachusetts, New Plymouth and others under the name of "Province of Massachusetts Bay in New England." This charter included the same territory in Iowa as did the charters of 1628 and 1629.

CROZAT'S PATENT.

1712. Louis XIV, King of France and Navarre, granted a patent to Anthony Crozat, for fifteen years, with the right to carry on a trade in the country between Carolina and New Mexico. The country was to retain the name of Louisiana and be annexed as a dependent of New France. The laws of France were extended to the province.

THE WESTERN COMPANY'S PATENT.

1717. Crozat surrendered his patent to the crown of France, and King Louis XV granted to the Western Company for twenty-five years the exclusive commerce of Louisiana, and the right of beaver trade with New France. The charter gave rights of civil and military jurisdiction. It was surrendered to the crown in 1730.

THE ACT OF FONTAINBLEAU.

1762. A preliminary treaty was signed between England, France and Spain, by which it was agreed that the boundary between the provinces of England and France should be irrevocably fixed by a line drawn in the middle of the Mississippi river, from its source to the Iberville, etc. Louis XV, king of France, ceded Louisiana to Spain. The province was formally taken possession of August 18, 1769. By this treaty the territory comprised in the bounds of the state of Iowa was definitely placed in the province of Louisiana, and the rights of the English claimants terminated.

THE TREATY OF PARIS.

1763. A definite treaty was signed between England, France and Spain, confirming the boundary between the possessions of England and France as agreed upon by the Act of Fontainbleau of 1762.

THE TREATY OF ILDEFONSO.

1800. A secret agreement was entered into by which the king of Spain was to recede the province of Louisiana to France, upon a fulfillment of certain considerations to be performed by the French republic.

The agreement of the Treaty of Madrid, made the following year, provided that the retrocession of Louisiana as provided in the Treaty of Ildefonso should be carried out.

THE TREATY OF PARIS.

1803. France ceded the province of Louisiana to the United States. The treaty was ratified and proclaimed October 1, 1803. The province comprised all west of the Mississippi river north and east of the Spanish possessions, with the Island of Orleans.

DISTRICT OF LOUISIANA.

1804. That part of the Province of Louisiana south of the thirty-third parallel was detached to form the Territory of Orleans, by act of congress, and the residue named "District of Louisiana," and placed under the control of the governor and judges of Indiana Territory.

TERRITORY OF LOUISIANA.

1805. A territorial government was established by congress in the District of Louisiana and the name changed to "Territory of Louisiana."

TERRITORY OF MISSOURI.

1812. The government of the Territory of Louisiana was reorganized and the name changed to "Territory of Missouri."

TERRITORY OF MISSOURI.

1821. Missouri was admitted as a state and the remaining portion of the territory, that part north and west of Missouri and Arkansas, left without any form of government.

MICHIGAN TERRITORY.

1834. The boundaries of Michigan Territory were extended by act of congress westward to the Missouri river. This act again placed Iowa among the governments east of the Mississippi river. Michigan Territory extended from Lake Huron to the Missouri river, and from the states of Ohio, Indiana, Illinois and Missouri north to the British possession.

WISCONSIN TERRITORY.

1836. Michigan Territory was divided by act of congress of April 20, 1836, and the western part established as "Wisconsin Territory."

IOWA TERRITORY.

1838. Wisconsin Territory was divided by act of congress of June 12, 1838, and the western part given a territorial government and named "Iowa Territory." This territory embraced the territory of the present state of Iowa, North and South Dakota east of the Missouri and White Earth rivers, and Minnesota west of the Mississippi river and a line drawn from its source to the British possessions.

STATE OF IOWA.

1846. Application was made to congress February 12, 1844, for admission of Iowa as a state. On the first day of November of that year a constitution was adopted by a territorial convention, with the following boundaries:

"Beginning in the middle of the main channel of the Mississippi river opposite the mouth of the Des Moines river; thence up the said river Des Moines, in the middle of the main channel thereof, to a point where it is intersected by the old Indian boundary line, or line run by John C. Sullivan in the year 1816; thence westwardly along said line to the 'old northwest corner of Missouri;' thence due west to the middle of the main channel of the Missouri river; thence up in the middle of the main channel of the river last mentioned to the mouth of the Sioux or Calumet river; thence in a direct line to the middle of the main channel of the St. Peters river, where the Watonwan river (according to Nicollet's map) enters the same; thence down the middle of the main channel of said river to the middle of the main channel of the Mississippi river; thence down the middle of the main channel of said river to the place of beginning."

An act of admission was passed by congress March 3, 1845, but at the election held on the fourth of August following the people rejected it.

The boundaries provided in the act of congress were as follows: "Beginning at the mouth of the Des Moines river at the middle of the Mississippi, thence by the middle of the channel of that river to a parallel of latitude passing through the mouth of the Mankato, or Blue Earth river, thence west along said parallel of latitude to a point where it is intersected by a meridian line, seventeen degrees and thirty minutes west of the meridian of Washington city, thence due south to the northern boundary line of the state of Missouri, thence eastwardly following that boundary to the point at which the same intersects the Des Moines river, thence by the middle of the channel of that river to the place of beginning."

On the 18th of May, 1846, another constitution was adopted by a second convention called for that purpose. This constitution proved acceptable to the people and was adopted at an election held August 3d, of the same year. On the following day, August 4, 1846, congress passed an act repealing the law of March 3, 1845, and accepting the boundaries of the state as defined in this last constitution and as they exist to-day. On the 28th day of December, 1846, congress passed the act admitting Iowa as a state in the Union. The boundaries were set forth in the act as follows: "Beginning in the middle of the main channel of the Mississippi river, at a point due east of the middle of the mouth of the main channel of the Des Moines river; thence up the middle of the main channel of the said Des Moines river to a point on said river where the northern boundary of the state of

Missouri—as established by the constitution of that state, adopted June 12, 1820—crosses the said middle of the main channel of the said Des Moines river; thence westerly along the said northern boundary line of the state of Missouri, as established at the time aforesaid, until an extension of said line intersects the middle of the main channel of the Missouri river; thence up the middle of the main channel of the said Missouri river to a point opposite the middle of the main channel of the Big Sioux river, according to Nicollett's map; thence up the middle of the main channel of the Big Sioux river, according to the said map, until it is intersected by the parallel of forty-three degrees and thirty minutes, north latitude; thence east along said parallel of forty-three degrees and thirty minutes, until said parallel intersects the middle of the main channel of the Mississippi river; thence down the middle of the main channel of the Mississippi river to the place of beginning."
